Introduction

AENS PROJECT & ENGINEERING SERVICES LTD, established in 1995 and incorporated in 2008, is a multidisciplinary engineering company dedicated to delivering innovative, dependable, and high-quality services across a broad spectrum of industries, including Marine, Oil & Gas, Energy and manufacturing. We provide Engineering, Procurement, Construction/Installation, Maintenance, and Project Management services with specialization in Electrical, Instrumentation & Control, Automation, Mechanical, and Civil Engineering disciplines.

With nearly three decades of experience, AENS has developed a strong reputation for technical excellence and client-focused delivery. Our services are tailored to meet the unique challenges of clients operating in the energy, oil & gas, manufacturing, and construction sectors—ranging from multinational corporations to government agencies.

In addition to our core engineering operations, we offer specialized personnel recruitment, training, and workforce management services, ensuring that our clients are equipped with skilled professionals who uphold the highest standards of safety, productivity, and efficiency.

Our team comprises seasoned engineers, project managers, and technical experts committed to executing projects that adhere to global quality standards, safety regulations, and timely delivery expectations. From concept to commissioning, we work collaboratively with our clients to design and implement solutions that drive long-term value and sustainability.

At AENS PROJECT & ENGINEERING SERVICES LTD, we are more than just service providers—we are strategic partners committed to powering progress and enabling growth. As the global landscape continues to evolve, we remain at the forefront—providing innovative and dependable engineering solutions that shape a smarter, stronger future.

About US

AENS PROJECT & ENGINEERING SERVICES LTD. is a leading Nigerian-based engineering company, incorporated in 2008 to provide world-class Engineering, Procurement, Construction/Installation, Maintenance, and Project Management services. With our multidisciplinary capabilities spanning Electrical, Instrumentation & Control, Mechanical, and Civil Engineering, we have positioned ourselves as a dependable partner to clients across various sectors.

Over the years, AENS has built a solid track record of successfully executed projects for both corporate organizations and government agencies in the energy, oil & gas, manufacturing, and construction industries. Our strength lies in our integrated approach—bringing together technical depth, project experience, and a commitment to global best practices.

Beyond our engineering services, AENS also provides recruitment, training, and workforce management solutions. We understand the value of skilled manpower and are dedicated to equipping our clients with competent professionals who enhance productivity and ensure operational excellence.

We operate with a clear vision: to deliver innovative, dependable, and efficient engineering solutions that meet evolving industry needs while maintaining the highest standards in safety, quality, and sustainability.

From feasibility studies to turnkey project execution, AENS stands out as a trusted name—consistently delivering excellence, fostering long-term partnerships, and empowering progress across Nigeria and beyond.

At AENS PROJECT & ENGINEERING SERVICES LTD., we don't just deliver projects, we deliver value.

HERE'S WHAT SETS US APART:

Multidisciplinary Expertise

We deliver integrated solutions across electrical, mechanical, civil, and instrumentation disciplines.

Proven Track Record

Over 15 years of successfully executed projects across key industries.

Skilled Workforce

We recruit, train, and manage certified professionals for high-performance delivery.

Commitment to Quality & Safety

We prioritize safety, compliance, and international best practices in every project.

Vision

To provide exellent quality of services and products that deliver maximum value to our clients in Nigeria and around the world.

Mission

To be one of the leading Engineering Services and Solutions providers in Africa, by providing our valued clients with dedication, cooperation, innovation, competitive pricing, highest service qualities and operational efficiencies in the Energy, Oil and Gas, manufacturing, and Construction Industries.

Values

In AENS, we must concurrently build shareholders value while respecting the environment, addressing the concerns of our neighbours / host communities, and providing for future needs.

Our Services

At AENS Projects & Engineering Services Ltd., we offer a comprehensive range of professional solutions across key engineering disciplines. Our services are designed to meet the evolving needs of our clients, ensuring quality, safety, and efficiency from concept to completion.

- Facility Inspection and Maintenance
- Project Engineering and Design
- Equipment Testing and Calibration

- Equipment and Materials Procurement
- Project and Construction Management
- Facility Construction and Commissioning
- Schneider Electric & ABB Certified MV/LV Panel/Switchgear Building, Modification, Maintenance/Repairs
- Repairs/Maintenance of Power Transformers, Generators, Electric Motors, Compressors & pumps

"Where **innovation** meets **reliability**. Engineering with purpose since 1995."

Our Products

Delivering World-Class Electrical & Instrumentation Solutions
At AENS, we offer a premium selection of Electrical and Instrumentation / Control devices from industry-leading brands including Schneider Electric, ABB, and Siemens.

We are a trusted stockist and solutions provider, delivering products that ensure safety, performance, and reliability across industrial and commercial sectors.

Power Distribution & Control

- Medium & Low Voltage Switchboards (Panels)
- Substation Equipment (MV/LV)
- MCCBs, ACBs, MCBs, Relays & Isolators
- Final Distribution Devices

Motor Control & Protection

- Motor Starters & Control Systems
- Contactors & Overload Relays
- Soft Starters & Variable Speed Drives (VSDs)

Measurement & Instrumentation

- Electrical Measurement Devices
- Sensors & Industrial Instrumentation

Control & Automation

- Signaling Devices (Relays, Pushbuttons, Pilot Lamps)
- Industrial Automation & Control Systems
- Process Control & Safety Systems
- Telemetry & Remote SCADA Systems

Wiring & Installation Accessories

- Switches, Sockets & Faceplates
- Distribution Boards (DBs) & Enclosures
- Earthing & Lightning Protection Devices
- Accessories & Installation Components

Why Choose AENS?

- Partnerships with global OEMs (Schneider, ABB, Siemens)
- International standards compliance
- Fast delivery & reliable stock
- Technical expertise & application support

Our Clients

Government Department & Agencies

"Our services and products help advance the work of national development."
Each project is delivered with strict adherence to industry standards and tailored to the unique needs of our clients, ensuring long-term reliability, safety, and efficiency.

Key Government Clients:

- Ministry of Power, Rivers State Government
- House Hospital Complex Bayelsa State Government
- Otuoke Hospital Facility Bayelsa State
- General Hospital Complex Yenagoa, Bayelsa State

Scope of Work Delivered:

- Construction & Installation of 33/11kV Lines
- Procurement, Installation, and Maintenance of:
  - MV/LV Transformer Substations
  - Switchgears
  - AMF/ATS Panels
  - Motor Control Centers (MCCs)
  - Control & Distribution Switchboards/Panels
- Industrial & Utility Services:
  - Landscape, Flood, Area, and Street Lighting Systems
  - Installation and Servicing of Industrial Machines and Equipment
  - Rural and Industrial Electrification Projects

Oil, Gas & Marine Services

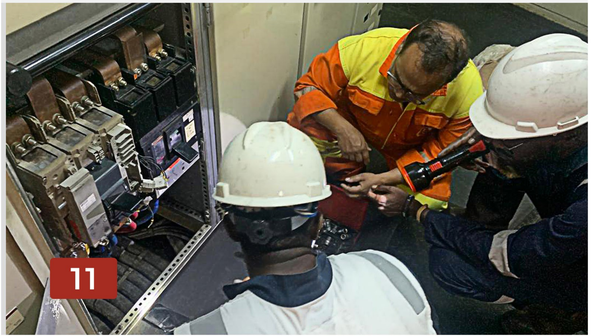
Keeping Operations Flowing in the Energy Industry
We provide critical support to the oil and gas / Marine sector by delivering reliable power and communication infrastructure that ensures uninterrupted operations.

Key Oil and Gas Clients:

V.Ships | THOME GROUP | PETROLOG | REMM OIL SERVICES | BAKER HUGHES a GE company

Scope of Work Delivered:

- Marine Electrical Engineering Maintenance Services On-board Vessels
- Installation & Maintenance of Marine Communication & Navigation Systems.
- Design, Construction, Installation & Maintenance of Power Distribution & Control Panels
- Installation & Maintenance of Power Transformers, Electric Motors, Compressors & UPS Power Sources
- Supply and Installation of Schneider Electric & ABB Low Voltage Productcs



Companies & Banks

Our solutions are designed to enhance workplace comfort, safety, and operational effectiveness for corporate offices and financial institutions.

Selected Clients and Projects:

STARZS MARINE & ENGINEERING LIMITED | AVONDALE SERVICES AND SUPPLIES LTD | PHED

Scope of Work Delivered:

- Design & Installation of Medium & Low Voltage Distrubution Systems
  Installation & Maintenance of Communication Systems.
- Design, Construction, Installation & Maintenance of Power Distribution & Control Panels
- Installation & Maintenance of Power Transformers, Electric Motors, Compressors & UPS Power Sources
- Supply and Installation of Schneider Electric & ABB Low Voltage Productcs

Hospitals, Residential Homes & Churches

Building Safety and Comfort in Homes and Organizations Nationwide
We provide robust electrical infrastructure and safety systems tailored to the unique needs of healthcare, residential, Commercial, Institutional and Religious facilities.

Selected Clients & Projects:

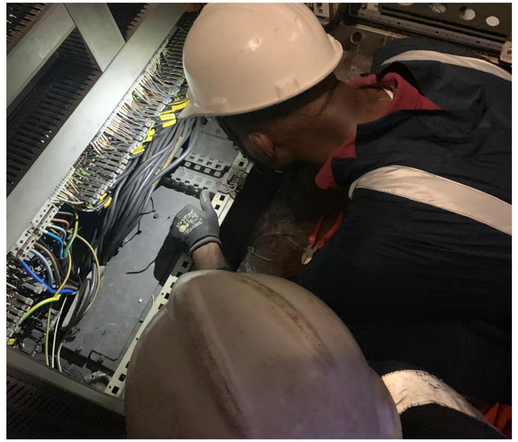
Living Faith Church

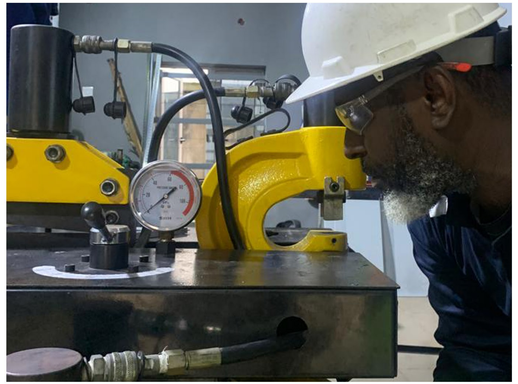
DIETE KOKI MEMORIAL HOSPITAL

MELFORD OKILO MEMORIAL HOSPITAL (500 BEDS)

Scope of Work Delivered:

- Design and construction of 33/11 kV lines
- Design, construction/installation of the following power systems:
  - MV/LV Transformer Substation
  - Power Distribution Switchboards
  - AMF/ATS/Synchronization Panels
  - Motor Control Centers (MCCs)
  - Landscape, Flood Area, and Street-lighting Systems
  - Installation and maintenance of industrial machines and equipment
  - Rural and industrial electrification projects





At **AENS Project & Engineering Services Ltd**, we remain committed to delivering innovative, reliable, and cost-effective engineering solutions. With a strong foundation in quality, safety, and technical excellence, we look forward to partnering with you to bring your projects to life from concept to completion.
